PROFILE SUMMARY

Software Engineer with hands-on experience in Python-based backend and security-focused application development on Windows and Linux platforms. Proficient in implementing firewall rules, web access controls, file auditing, and secure data handling. Experienced in API integration, desktop UI development, and database-backed log and event management systems. Published a research paper on adversarial threats in AI, with a strong interest in cybersecurity, system security, and building scalable backend solutions.

EXPERIENCE

Software Engineer

Cyarmorhub Pvt Ltd | June 2025 – Present

- Developed Python-based endpoint security agents for Windows and Linux.
- Implemented firewall rules for website blocking, allowing, and unblocking, along with USB control.
- Built Electron + React.js desktop UI to display system and session details.
- Implemented file auditing, event log collection, and storage using MongoDB and TXT.
- Integrated PII data scanning with masking, encryption, CSV export, and OCR-based validation.
- Packaged agents as Windows EXE installers and integrated backend APIs.

EDUCATION

Master of Computer Applications (MCA)

Nehru College of Engineering and Research Centre, Thrissur

Graduation: June 2025 | CGPA: 8.31

Bachelor of Computer Applications (BCA)

Sree Narayana Guru College of Advanced Studies, Thrissur

Graduation: April 2023 | CGPA: 7.642

SKILLS

Technical Skills

- Programming: Python
- Backend: Django, Flask, REST APIs
- Frontend: HTML, CSS, JavaScript, Bootstrap, React.js, Electron
- Databases: MySQL, MongoDB, SQLite
- Security: Endpoint Security, Firewall Rules, USB Control, DoS Detection, Honeypots, PII Protection
- Machine Learning: Supervised & Deep Learning
- Tools & Version Control: Visual Studio Code, Visual Studio, Git, GitHub
- Operating System: Windows, Linux

Soft Skills

Quick Learner, Adaptable, Teamwork, Problem-solving, Communication

PROJECTS

Rapid Care Service

Python-based web app for managing blood and organ donation, emergency, and food services. Built using HTML, CSS, JavaScript, Python, and SQLite. Features secure login and request management.

Voter Ballot Cycle

Campus election voting system using Django and SQLite. Automates voter registration and vote casting while ensuring transparency and security.

AI-Powered DoS Attack Analysis and Forecasting

Flask-based ML/DL project integrating honeypots for real-time DoS attack detection and prevention. Technologies: Python, MySQL.

RESEARCH PAPER

Fortifying AI: Combating Adversarial Threats in Cybersecurity

Explores adaptive defense mechanisms for protecting ML models from adversarial attacks.

INTERNSHIP

- Web Development – Cognifyz | Mar 2025 – Apr 2025
- Cybersecurity – Place Mantra | Jan 2025 – Mar 2025

CERTIFICATIONS

- Python Full Stack – Pentagon Space
- Internet of Things – NPTEL
- Certificate of Publication – JETIR
- Certificate of Industrial Training – Place Mantra
- NeCTAR 2025 – Nehru College of Engineering & Research Centre
- Business Analytics with Excel – Simplilearn
